Journal of Microscopy

Patron: HER MAJESTY THE QUEEN

Officers and Council 1986–87

President: J. S. PLOEM

Vice-Presidents: A. HOWIE
GILLIAN BULLOCK

Executive Hon. Secretary: J. LITTLE

Hon. Treasurer: B. C. COWEN

Hon. Secretary (Education): D. J. JOHNSON

Hon. Secretary (Science): M. J. GORINGE

Ordinary Members of Council:

J. E. BEESLEY
B. BRACEGIRDLE
E. D. BOYES
G. A. D. BRIGGS
M. ISABEL FILIPE
D. J. GOLDSTEIN
P. J. HIGHTON
D. B. HOLT
R. W. HOROBIN
JULIA KING
T. F. PAGE
N. G. WRIGLEY

Hon. Joint Editors:

C. V. HOWARD
R. M. GLAESER
AUDREY M. GLAUERT
D. C. JOY
W. M. STOBBS

Administrator: P. G. FLEMING

Authorization to photocopy for internal or personal use or the internal or personal use of specific clients is granted by The Royal Microscopical Society for libraries and other users registered with the Copyright Clearance Centre (CCC) Transactional Reporting Service, provided that the stated base fee of $02.00 per copy is paid directly to the CCC, 27 Congress Street, Salem, MA01970, U.S.A. This consent does not extend to other kinds of copying, such as copying for general distributions, for advertising or promotional purposes, for creating new collective works, or for resale. Special requests should be addressed to the Editor. 0022-2720/87 $02.00.

Contents of Vol. 145

Part 1

J. Serra. Morphological optics 1

José María Carazo and José L. Carrascosa. Information recovery in missing angular data cases: an approach by the convex projections method in three dimensions 23

E. Schweda, Z. C. Kang and L. Eyring. *In situ* oxidation and reduction of the oxides of cerium, praseodymium and terbium by high-voltage electron microscopy 45

W. Boguth. Determination of the direction of the crystal optical axis of ground uniaxial precious stones by means of polarized-light microscope photometry 55

J. R. Fryer and D. L. Dorset. Direct imaging of paracrystalline phospholipid structure in the electron microscope 61

A. Gramsbergen, L. P. Kok, K. Poortema and W. Schaafsma. Determining nucleolar multiplicity and cell number from sectional data 69

K. P. Ryan, D. H. Purse, S. G. Robinson and J. W. Wood. The relative efficiency of cryogens used for plunge-cooling biological specimens 89

A. D. Hyatt, B. T. Eaton and R. Lunt. The grid-cell-culture technique: the direct examination of virus-infected cells and progeny viruses 97

P. O. Gerrits, M. B. M. van Leeuwen, M. E. Boon and L. P. Kok. Floating on a water bath and mounting glycol methacrylate and hydroxypropyl methacrylate sections influence final dimensions 107

Short Technical Note

Carol M. Park, Philip E. Reid, David C. Walker and Brian R. MacPherson. A simple, practical 'swiss roll' method of preparing tissues for paraffin or methacrylate embedding 115

Rapid Publication

M. A. Williams. Infinite thickness in autoradiographs of carbon-14 RP1

Part 2

L. M. Cruz-Orive. Particle number can be estimated using a disector of unknown thickness: the selector 121

J. L. Chermant, M. Coster and G. Gougeon. Shape analysis in R^2 space using mathematical morphology 143

José María Carazo and José L. Carrascosa. Restoration of direct Fourier three-dimensional reconstructions of crystalline specimens by the method of convex projections 159

H. A. Levy, Stephen M. Margle, Ed P. Tinnel, Richard C. Durfee, Donald E. Olins and Ada Olins. The varifocal mirror for 3-D display of electron microscope tomography 179
M. Pluta. Variable wavelength microinterferometry of sections, layers, thin films, and other like objects 191
R. B. Marinenko, R. L. Myklebust, D. S. Bright and D. E. Newbury. Digital X-ray mapping compositional mapping with 'standard map' corrections for wavelength dispersive spectrometer defocusing 207
F. Hofer. A method for preparation of thin corrosion layers of brass for TEM investigations 225

Short Technical Notes
J. Cooper and R. W. R. York. Facilitation of low dose microscopy on Philips EM400 series electron microscopes 233
C. H. Wouters, J. Bonnet, G. Vletter, H. K. Koerten and J. S. Ploem. Specimen stage incorporating light microscopical optics for a Cambridge S180 electron microscope 237

Letter to the Editor; Book Reviews; Corrigenda 241

Part 3

Michael Unser, James R. Ellis, Thierry Pun and Murray Eden. Optical background estimation in EELS 245
J. Cazaux. Some considerations of the lateral resolution in Auger electron spectroscopy 257
C. A. Randall, D. J. Barber and R. W. Whatmore. *In situ* TEM experiments on perovskite-structured ferroelectric relaxor materials 275
Anthony J. Bourdillon, Richard D. Brydson and Brian G. Williams. Electron Compton scattering from beryllium and graphite using parallel detection 293
D. Enk and I. H. Pawlowitzki. An improved darkfield-illuminator for direct surface imaging of chromosomes 301
Alfons B. A. Kroese and Sietse M. van Netten. The application of incident light polarization microscopy for the visualization of vertebrate sensory hair cells *in vivo*. 309
J. Pawley and H. Ris. Structure of the cytoplasmic filament system in freeze-dried whole mounts viewed by HVEM 319
M. G. Gutierrez-Gonzalvez, R. Armas-Portela and J. C. Stockert. Differential staining of biological structures by ruthenium red 333

Short Technical Notes
Cary N. Cherr and Nicholas L. Cross. Immobilization of mammalian eggs on solid substrates by lectins for electron microscopy 341
V. L. Hamilton-Attwell, Jeanetta du Plessis and C. J. van Wyk. A new scanning electron microscope (SEM) method for the determination of particle size in parenteral fat emulsions 347
Kerstin G. Helander. Studies on the rate of dehydration of histological specimens 351
A. L. Arsenault, E. Spitzer and G. T. Simon. Improved preservation of cartilage extracellular matrix by freeze dried embedding 357
